MEMORANDUM FOR THE RECORD

Subject: DDI and DDS&T Records Officers Meeting - 12 May 1964 held at 10:00, Room 4F-31, Headquarters

1. On 12 May 1964, I met with the following Records Officers from the DDI and DDS&T Areas. (See attachment for those attending). 2. We discussed these items: (a) Use of Form 2218, Equipment Inventory. developed this form and has been using it for sometime STAT in maintaining an inventory of filing equipment. He takes an Inventory in March each year. All present agreed that they could use the form. I agreed that we can use a copy of it for our Agency-wide Annual Equipment Inventory. I will suggest its use to the Records Officers in the DDS and DCI when I meet with them on 14 May. (b) Interpretation of Disposal Instructions. STAT and reported that personnel at the STAT Records Center interpreted the Disposition Instructions on destruction of records to apply to the date of the record rather than the date applicable at the time of receipt at the Records Center. advised that he STAT would revise his Records Control Schedule to provide for a more precise wording, such as "Destroy 5 years after receipt at the Center". (c) Destruction of records--all those present prefer to see some provision for notifying Records Officers prior to the destruction of records by the Center. They agreed, however, that if the Records Center had not received a response in 30 days that destruction should take place. I advised them that I would take this matter under consideration. STAT (d) Top Secret Logs inquired as to the status of the Disposition Instructions. (e) Delay in Transfer of OCR Reference Materials to the Center. STAT

reported that large volumns of OCR reference materials were accumulating at Headquarters because they are under the impression that the Records Center will not accept them. I advised we accept all records at the Center if they are scheduled and if the disposition instruction is specific. He felt that there must be some misunderatanding about this so I agreed to contact him later and discuss the matter further.

(f) invited those present to see the Map Library They use several different tupes of shelf filing for the Maps.

(g) inquired as to whether the Records Center has completed the destruction of approximately 79 cubic feet of Source Jackets. I will check with the Center and avise him.	STA
3. I Outlined very briefly the AREA Conference and the Federal Records Officers Conference. I also pointed out that GSA has been requested by the Congress to take action on getting Agencies to do more in the Records Disposal field.	
4. It was the consensus of the group that this meeting was worthwhile and they suggested a general Records Officer Conference sometime this year.	STAT STAT
